To Whom It May Concern

Re: Positioning of Gamma Frames Within Walls

It is permitted to change the position of the Gamma Bracing Frames (GBF) within the wall framing. The same quantity of GBF's must be maintained as to not impede the structural performance requirements of the walls original layout. (See examples in Figure 1 & 2 below).

The GBF's must be installed as per the instructions detailed in the Gamma Bracing System Technical Manual.

Figure 1: Original Design Layout

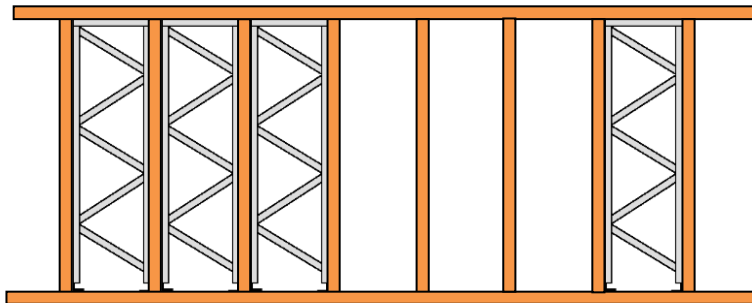

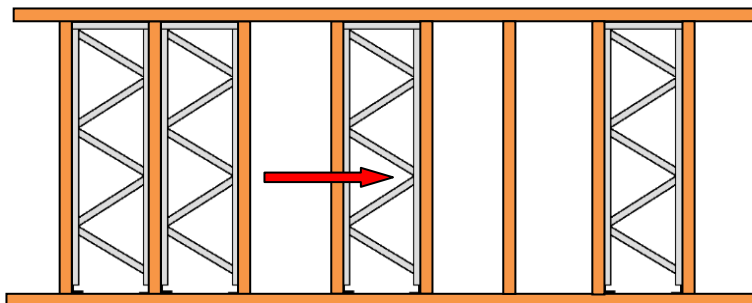

Figure 2: New Design layout with the 3 Gamma Frame re-positioned in the wall.

For any queries regarding any of the above please contact us on 0800 272 733

Yours Faithfully
